## SUMMARY

I am a computer science major looking for a coop position at Converting Systems to work with Engineers to recycle, reuse, and remanufacture industrial machines. I work well with those who are unfamiliar with computers and their quarks.

Example: The company's owner only does electrical drawing, on-site Inspections, and Software implementation. I worked with him, so all computer problems and software implementations were directed at me.

## EDUCATION

Computer Science | University of Dayton  
Dayton, OH | GPA X.X / 4.0

Graduation Year 2025

- RELEVANT COURSES: Creative Media Applications, Algorithms and Programming II

## WORK EXPERIENCE

Computer Science Intern | Converting Systems  
Schaumburg, IL

05/2024 - 08/2024

- Worked with engineers to meet deadlines for refurbished machines
- Improved hundreds of database entries on the website
- Saved countless hours by solving technology related problems
- Created guides for customers explaining software uses

## PROJECT EXPERIENCE

Messenger App | Capstone Class

- Worked with a group to create a messenger app

## SKILLS

- Microsoft Office skills | Computer troubleshooting skills
- Programming | Python, Java

Creative Media Applications  
Algorithms and Programming I  
Algorithms and Programming II  
Computer Organization and Architecture  
Discrete Structures  
Data Structures and Algorithms  
Concepts and Implementation of Programming Languages  
Design and Analysis of Algorithms
